1. This Air Purifier is designed for use on a flat, level surface and may not work properly on an uneven surface. **ALWAYS** place this Air Purifier on a firm, level surface. **ALWAYS** place the Air Purifier at least six (6) inches away from walls and heat sources such as stoves, radiators, or heaters.
2. Place the Air Purifier in an area that is out of the reach of children.
3. Before using the Air Purifier, extend the cord and inspect for any signs of damage. **DO NOT** use the product if the cord has been damaged.

6. **DO NOT** tilt or move the Air Purifier while it is in operation. Shut off and unplug before moving.
7. **DO NOT** immerse the Air Purifier in water as permanent damage will occur. Refer to and follow the **CLEANING AND FILTER REPLACEMENT** instructions.

Introduction

Thank you for purchasing the *HEPAtech*TM Air Purification System from Hunter Fan Company. You have purchased our latest development in portable Air Purification Systems. This system has been developed to improve the quality of the air you breathe.

Our *HEPAtech*TM Air Purification System out performs other air purification systems by quickly and effectively removing dust, smoke, and pollen particles as small as .1 microns in size. Room air is pulled in through the front grill and cleaned across the *HEPAtech*TM filter. Clean air is then released out the top grill in order to avoid stirring up settled particles.

Using the Ionizer

Using the ionizer improves the quality of air in the room. Negative ions are released into the air and positively charged dust, smoke, and pollen particles are attracted to the negative ions. These particles settle out of the air and can be vacuumed up during normal cleaning. These particles are also more easily captured by the *HEPAtech*TM filter as they pass through the *HEPAtech*TM Air Purification System. To ensure the best air circulation in the room, we recommend that you place your air purifier six inches away from any walls.

Air Purifier Features

Using Your Air Purifier

1. Remove your air purifier from the box and take it out of the clear plastic protective bag.
2. Place your *HEPAtech*[™] Air Purification System on a firm, flat surface.
3. Before turning the Air Purifier 'on', you need to open the front grill. To release the front grill, place your fingers behind the tabs and pull forward.
4. The filter will be installed in the correct position. Grasp the filter and pull it forward. Remove the plastic wrapping and replace the filter in the unit. The white filter material should be facing outward (towards you) and the wire mesh side should be hidden from view (inside the unit).
5. Replace the front grill. Be sure that the bottom tabs are in location first, and then push the top of the grill forward until it is closed. The unit is now ready for normal operation. **NOTE:** This unit will not operate unless the door is placed in the correct position.
6. Plug the unit into a 120V electrical outlet.

Cleaning And Filter Replacement

1. Clean the outside of the unit with a soft, damp cloth. The front grill can be removed and cleaned in soapy water.
2. At least every 90 days, open the front grill, remove the carbon pre-filter, and replace it. This is necessary to maintain proper odor-removing and overall filtration performance. If necessary, it can be changed more often. Mark the new filter installation sticker included with the new carbon pre-filter. Be sure to remove any plastic wrapping that may be on the new filter before you place it into the Air Purifier.
3. While replacing the pre-filter, you should view the condition of the *HEPAtech* Filter. Compare the filter to the color coded chart that is on the inside of the housing. If the filter matches the dark color on the chart, you should remove the filter and replace it with a new filter. Be sure to remove any plastic wrapping that may be on the new filter before you place it into the Air Purifier.
