READ AND SAVETHESE INSTRU

WARNING 🕰

TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK, OR IN-JURY TO PERSONS, OBSERVE THE FOLLOWING:

- Use this unit only in the manner intended by the manufacturer. If you have questions, contact the manufacturer at the address or telephone number listed in the warranty.
- Before servicing or cleaning unit, switch power off at service panel and lock the service disconnecting means to prevent power from being switched on accidentally. When the service disconnecting means cannot be locked, securely fasten a prominent warning device, such as a tag, to the service
- Installation work and electrical wiring must be done by a qualified person(s) in accordance with all applicable codes and standards, including fire-rated construction codes and standards.
- Sufficient air is needed for proper combustion and exhausting of gases through the flue (chimney) of fuel burning equipment to prevent backdrafting. Follow the heating equipment manufacturer's guideline and safety standards such as those published by the National Fire Protection Association (NFPA), and the American Society for Heating, Refrigeration and Air Conditioning Engineers (ASHRAE), and the local code authori-
- When cutting or drilling into wall or ceiling, do not damage electrical wiring and other hidden utilities.
- Ducted fans must always be vented to the outdoors.
- Acceptable for use over a tub or shower when connected to a GFCI (Ground Fault Circuit Interrupter) - protected branch circuit (ceiling installation only).
- This unit must be grounded.

TYPICAL INSTALLATIONS

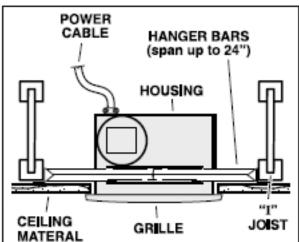

Housing mounted to I-joists.

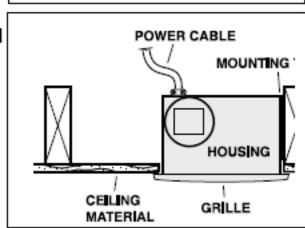

Housing mounted anywhere between <u>trusses</u> using <u>hanger bars</u>.

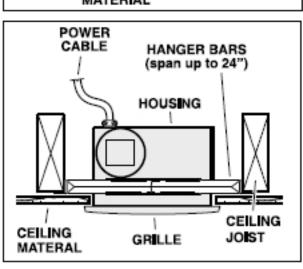

Housing mounted anywhere between <u>I-joists</u> using hanger bars.

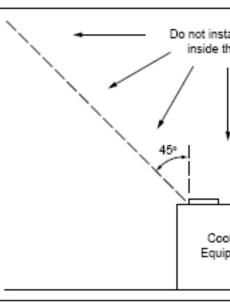

Housing mounted to joists.

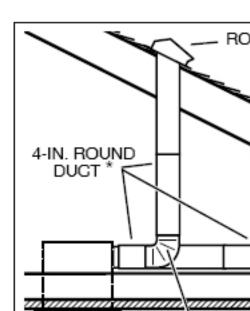

Housing mounted anywhere between <u>joists</u> using <u>hanger bars</u>.

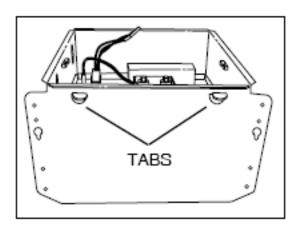

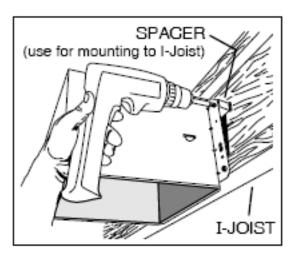

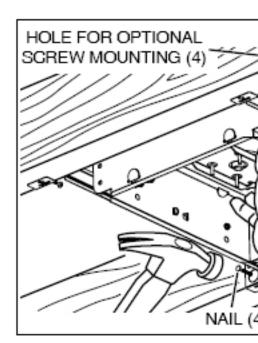

INSTALL HOUSING & DUCT

1a.Mount housing to joist or I-joist.

Use a pliers to bend housing TABS out to 90°. Hold housing in place so that the housing tabs contact the bottom of the joist. The housing mounts with four (4) screws or nails. Screw or nail housing to joist through lowest holes in each mounting flange, then through highest holes. NOTE: Mounting to I-JOIST (shown) requires use of SPACERS (included) between the highest hole of each mounting flange and the I-joist.

Extend HANGER BARS to the

Hold ventilator in place with around the BOTTOM EDGE (

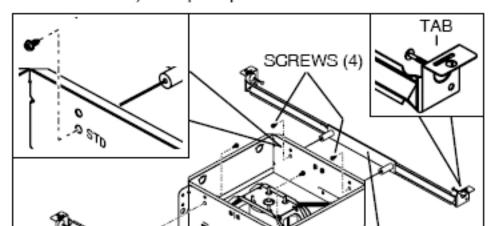

NAIL ventilator to framing or fa through HOLES near nails.

To ensure a noise-free mount with SCREWS or use a plier tightly around hanger bars.

OR

Mount housing anywhere between trusses, joists, or I-joists using hanger bars.

Sliding hanger bars are provided to allow for accurate positioning of housing anywhere between framing. They can be used on all types of framing (I-joist, standard joist, and truss construction) and span up to 24".

2. Attach damper/duct connector.

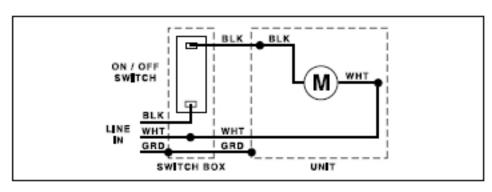

Snap damper / duct connector onto housing. Make sure connector is flush with top of housing and damper flap falls closed.

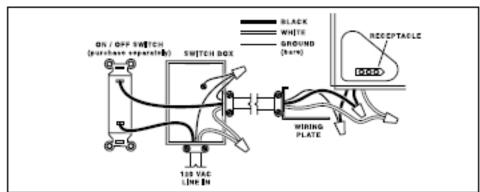

3. Install 4-inch round duct-

CONNECT WIRING

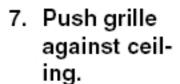

Connect electrical wiring.

Run 120 VAC house wiring to installation location. Use proper UL approved connector to secure house wiring to wiring plate. Connect wires as shown in wiring diagrams.

INSTALL GRILL

- Finish ceiling. Install ceiling material. Cut of
- 6. Attach grille to housing.
 Squeeze grille springs and insert them into slots on each side of housing.
